EDUCATION

B.Tech Artificial intelligence and data science,

Anand institute of higher technology

2022 - 2026

CGPA - 7.84

Higher Secondary

St.Joseph's higher secondary school,

2021 - 2022

Cuddalore

SSLC

St.Joseph's higher secondary school,

2019 - 2020

Cuddalore

INTERNSHIP

Junior AI&ML Intern

Spacezone India

10/2025 - Present

Chennai

PLacement

- Selected as an AI & ML Intern at SpaceZone India with a stipend, gaining hands-on experience in developing and implementing machine learning models and AI solutions.

Artificial Intelligence and Machine learning Intern

Arul Technologies

09/2024

Chennai

Achievements

- Developed the project Multiple Disease Prediction Using Machine Learning

Cyber Security and Ethical Hacking Intern

Codtech IT Solution.pvt.lmt

Chennai

Achievements/Tasks

- Performed security assessment of web applications, focusing on vulnerability detection and remediation strategies.

PROJECTS

Whatsapp FAQ Chatbot (Using N8n)

- Designed and implemented a customer support chatbot for handling inquiries about company services and products, currently deployed on the organization's website.

Mail Automation (Using N8n)

- Developed an automated email system that retrieves student data from Google Sheets and sends personalized scorecards automatically for my internship company.

Lost Item Finder (Mobile Application Using IOT) (2025)

- Designed and developed a smart lost-item finder using Flutter and ESP32 that tracked items via Wi-Fi signal strength and triggered real-time LED/buzzer alerts for quick recovery.

Multiple Disease Prediction (Using ML) (2024)

- Developed a machine learning system that predicted diseases like diabetes, heart disease, and Parkinson's from user health inputs to assist early and accurate diagnosis.

Self Health Diagnosis (Web application) (2024)

- Developed *Self Health Diagnosis*, a web app that assessed user symptoms and suggested possible conditions with care tips or medical advice..
