

LOGESWARAN C

Backend | AI&ML developer

loguloges778@gmail.com | LinkedIn:logu-loges | 9360689727 | Chennai

Forward-thinking B.Tech (AI & Data Science) graduate specializing in building and deploying intelligent systems and full-stack web applications. Proven expertise in developing RAG-based AI Chatbots and Agentic AI solutions using Ollama and Python (FastAPI), integrated with responsive React.js frontends. Hands-on experience in scaling AI applications via AWS EC2 and managing end-to-end E-commerce platforms with data-driven workflows. Skilled in bridging the gap between complex AI models and user-centric web interfaces to deliver high-performance production environments.

Skills

AI & ML: RAG (Retrieval-Augmented Generation), Agentic AI, LLM Integration (Ollama, OpenAI), Prompt Engineering.

Backend & Frameworks: Python (FastAPI, Flask), Java (Spring Boot), Node.js.

Data & Databases: MySQL, PostgreSQL, Relational Database Design.

Cloud & DevOps: AWS (EC2), Render, Git, GitHub, Linux Server Management.

Frontend: React.js, Flutter (Mobile AI integration).

Experience

- Jr.AI&ML developer | September 2025 – Present

Infinitetech AI - Chennai

Project 1: Enterprise AI Chatbot Development (RAG Architecture)

- Designed and implemented a custom AI chatbot using Python and FastAPI.
- Leveraged RAG to enable the chatbot to retrieve and process specific local data for context-aware responses.
- Utilized Ollama for local LLM orchestration, ensuring data privacy and reducing API latency.

Project 2: Agentic AI & SEO Automation Tools

- Developed AI agents to automate SEO workflows, improving digital brand visibility for Cosmocartt.
- Built automated pipelines for keyword research and product description generation using LLMs.

Project 3: AWS Cloud AI Deployment

- Deployed AI-driven web applications on AWS EC2 instances, configuring scalable environments for model inference.
- Optimized server performance to handle concurrent user queries for the integrated chatbot.

Project 4: Full-Stack E-commerce Platform with Intelligent Analytics

- Project Overview: Developed a high-performance, end-to-end e-commerce application featuring a robust product catalog and secure checkout system.
- Frontend Development: Architected a type-safe and responsive user interface using TypeScript and React, ensuring seamless state management

- **Backend & API Design:** Engineered a scalable RESTful backend using Python Flask, implementing complex business logic for order processing and inventory management.
- **Database & Security:** Designed and optimized a MySQL relational database to handle high-concurrency transactions and secure user data storage.
- **Cloud Deployment:** Successfully deployed and managed the application on AWS EC2, configuring automated environments for consistent uptime and performance.

Education

- **B.Tech – Artificial Intelligence and Data Science**
EASA College of Engineering and Technology (2021 – 2025)
Percentage: 75%
- **Higher Secondary (Maths & Biology)**
Sri Vikasa Vidyalaya Matric hr.sec School (2019 – 2021)
Percentage: 86%
- **SSLC (10th Standard)**
Thai Matriculation School (2018 – 2019)
Percentage: 86%

Certifications

- AI&ML Internship in Marcello Tech
- Full stack python certification in Refinement software solution
- Python Internship in Refinement software solution
- AI Intern in Adrasti
- AWS solution Architect Associate in Greeks for geeks

Core Competencies

- **AI Model Orchestration & RAG Architecture:** Developing context-aware intelligent systems using Ollama and Retrieval-Augmented Generation (RAG) to process localized data.
- **Full-Stack Web Development:** Designing and maintaining end-to-end applications using FastAPI (Python) for backend and React.js for interactive frontends.
- **Agentic AI & Task Automation:** Building autonomous AI agents to automate complex workflows, including SEO automation and content generation.
- **Cloud Infrastructure & Deployment:** Hands-on experience in deploying and scaling production-grade applications on AWS EC2 and Render.
- **Database Design & Management:** Architecting robust relational schemas and optimizing queries using MySQL and PostgreSQL.
- **Enterprise System Development (HRMS):** Developing scalable business logic and internal tools using Java Spring Boot and MVC architecture.
- **Mobile Application Development:** Building cross-platform mobile solutions using the Flutter framework for seamless user experiences.
- **E-commerce Ecosystem Management:** Managing end-to-end digital retail operations, including SKU management and marketplace optimization on Amazon/Flipkart.
- **RESTful API Design & Integration:** Implementing secure and high-performance APIs to bridge AI models with web and mobile interfaces.
- **Version Control & Agile Collaboration:** Proficient in Git/GitHub for code management and experienced in working within Agile development lifecycles.
