

Suriyaprakash M

AI Engineer | Machine Learning | NLP | Deep Learning

Tiruvannamalai, Tamil Nadu, India | +91 6382936199 | suriyaprakash444m@gmail.com | linkedin.com/in/suriyaprakash444 | github.com/Srxxya

Summary

AI Engineer specialising in Machine Learning, Deep Learning, NLP, and Agentic AI with hands-on experience building predictive models, LLM-integrated chatbots, and end-to-end ML pipelines using Python, TensorFlow, and Scikit-learn. Proficient in feature engineering, hyperparameter tuning, REST API deployment, transformer architectures, and prompt engineering. Seeking AI/ML/Data Science internship roles to deliver scalable, data-driven solutions.

Experience

Artificial Intelligence Intern

VIPS Tech — AI Internship Program

Remote • Jul 2025 – Aug 2025

- Built an NLP-powered Q&A chatbot for tomato plant disease detection using Python and TensorFlow, improving response accuracy by **20%**.
- Applied supervised ML algorithms and hyperparameter tuning (GridSearchCV) to agricultural datasets, reducing manual diagnosis time by **30%**.
- Deployed model via REST API endpoint, enabling real-time inference at scale; improved F1-score by optimising classification thresholds.

Engineering Intern

Chennai Port Authority

Chennai, India • May 2025 – Jun 2025

- Analysed operational workflows and documented logistics processes, identifying **3 efficiency bottlenecks** across port operations.
- Collaborated with engineering teams on infrastructure monitoring; produced process-efficiency reports adopted by senior management.

Projects

CLEARA — AI-Powered Data Cleaning & Preprocessing Tool | github.com/Srxxya/Cleara-API

Tech: Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook

- Engineered an automated pipeline to detect missing values, duplicates, and outliers in structured datasets, reducing manual cleaning effort by **60%**.
- Implemented normalisation, feature scaling, and categorical encoding workflows; improved downstream model training efficiency by **35%**.

AEGIS — Natural Disaster Prediction & Alert System | github.com/Srxxya/AEGIS-AI-DISASTER

Tech: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Random Forest, Gradient Boosting

- Developed ensemble ML models to forecast floods and earthquakes, achieving **25% improvement** in early-detection accuracy over baseline.
- Applied feature engineering on historical environmental data; reduced false-positive rate by **18%** via threshold calibration.

CAP — Cognitive Agent Platform | github.com/Srxxya/Cognitive-Agent-Platform

Tech: Python, LLM APIs, NLP, Agentic AI, REST API, Multi-step Reasoning

- Designed an intelligent autonomous agent system that understands natural language, performs multi-step reasoning, and executes actions across digital tools — reducing cognitive workload for individuals and enterprises.
- Architected a persistent LLM-based planning engine integrating action execution across information-heavy workflows; built as a scalable AI partner platform.

Education

B.Tech — Artificial Intelligence & Data Science

Gojan School of Business and Technology

Tamil Nadu, India

2023 – Expected 2027

Higher Secondary Education (Class XII)

Government Higher Secondary School

Tamil Nadu, India

2022 – 2023

Technical Skills

Languages

Python, SQL

ML / DL

Supervised & Unsupervised Learning, Classification, Regression, Neural Networks, CNNs, Hyperparameter Tuning, Model Evaluation, Scikit-learn, TensorFlow, Keras

NLP / Agents

Text Processing, Tokenisation, Intent Classification, Chatbot Dev, Prompt Engineering, Agentic AI

Data / Analysis

Pandas, NumPy, Matplotlib, Seaborn, Feature Engineering, Data Cleaning, Outlier Detection

Deployment

REST API, Flask, Git, GitHub, Jupyter Notebook, Google Colab, VS Code

AI Concepts

ML Pipelines, Model Optimisation, LLM Fundamentals, RAG (basics), Transfer Learning

Certifications & Coursework

ML Specialization — DeepLearning.AI & Stanford / Andrew Ng (*Coursera*) | **Linear Algebra for ML** — Imperial College London (*Coursera*)

| **AI Data Engineer** — Reliance Foundation | **Python** — GUVI / IIT Madras
