EDUCATIONAL BACKGROUND

B.Tech - Artificial Intelligence & Data Science

2022 - 2026
CGPA - 8.0

EXPERIENCE

Data Science Internship

Praya Labs Virtual Internship

(May 2023)

- Completed a virtual internship focused on building a Data Science project from May 2nd to May 10th, 2023.
- Demonstrated responsibility, sincerity, and a genuine desire to take on new challenges
- Delivered a high-quality project on time, showcasing strong learning ability and dedication.

PROJECTS

AI-BI Platform — End-to-End ML & Business Intelligence Deployment

Feb - 2026

- Developed and deployed a multi-model ML system for revenue prediction, churn classification, and customer segmentation. Achieved R^2 0.847 (₹1,234 MAE), 85.3% accuracy (81.5% recall), and 0.487 silhouette score using structured retail data with preprocessing and scaling. Built an interactive Streamlit dashboard for real-time and batch predictions with serialized models.
- **Tech:** Python, Pandas, NumPy, Scikit-learn, Streamlit, Joblib

SmartRent Predictor — End-to-End ML Deployment

Nov - 2025

- Built and deployed a rental price prediction model using Scikit-learn. Engineered structured dataset (200 listings, 10 localities) with feature encoding and preprocessing pipeline. Achieved 89.56% R^2 with ₹1,823 MAE using 80–20 train-test validation. Evaluated model using R^2 , RMSE, MAE with overfitting checks. Deployed interactive Streamlit web app with Pickle model serialization.
- **Tech:** Python, Pandas, NumPy, Scikit-learn, Streamlit

E-Commerce Intelligence Report (Business Analytics Capstone)

Jan - 2026

- Performed end-to-end data cleaning, transformation, and EDA on transactional dataset. Identified revenue drivers, customer purchase patterns, and product performance trends. Generated business-focused visualizations to support data-driven decisions.
- **Tech:** Pandas, NumPy, Matplotlib, Seaborn

COURSE AND CERTIFICATIONS

- Java Programming and JAVA Basic Programs – Great Learning
- Python for Machine Learning - Great Learning
- Introduction to R - Great Learning
- Python for Data Visualization - LinkedIn

SKILLS AND EXPERTISE

- Programming: Python (Intermediate), JAVA (Basic)
- Data Analysis & Processing: Pandas, NumPy, Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)
- Machine-Learning: Scikit-learn (Regression, Classification, Clustering), Train-Test Validation, Model Evaluation (R^2 , RMSE, MAE, Precision/Recall, F1-score), Overfitting Detection, Hyperparameter Tuning
- Deep Learning: Neural Networks (NumPy), CNNs, RNNs, LSTMs, Transfer Learning, TensorFlow, Keras
- Data Visualization: Matplotlib, Seaborn
- Deployment and Tools: Streamlit, Model Serailization (Pickle, Joblib), Git, GitHub, Google Colab, VS Code, Vercel
