

HARISH U
AI/ML ENGINEER

Chennai, Tamil Nadu | +91 7305875450 | harish19102003@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

AI/ML Engineer with expertise in machine learning, deep learning, and generative AI. Skilled in designing end-to-end ML pipelines, developing predictive models, and deploying scalable AI solutions on cloud platforms. Experienced in natural language processing, computer vision, and applying MLOps practices to build production-ready applications.

EDUCATION

Jeppiaar Engineering College

(Aug 2021 – May 2025)

- Bachelor of Engineering in Electronics and Communication Engineering (ECE)
- Cumulative Grade Point Average: 7.44

Vyasa Vidyalaya Matriculation Higher Secondary School

(Aug 2019 - May 2021)

- Higher Secondary Certificate (XII): 79.1%

ST Thomas Matriculation Higher Secondary School

(Aug 2018 - May 2019)

- Secondary School Leaving Certificate (X): 68.2%

TECHNICAL SKILLS

- **Programming Languages:** Python, MySQL
- **Machine Learning & Deep Learning**
- **Data Processing & Analysis**
- **Natural Language Processing & Generative AI**
- **MLOps & Deployment:** Git, MLflow, Docker, FastAPI, Streamlit, Gradio, Uvicorn
- **Cloud Platforms:** AWS (EC2, Elastic Beanstalk)
- **Data Visualization & Analytics**

CERTIFICATIONS

- **WorldQuant University:** Applied Data Science Lab
- **Google Cloud Skills Boost:** Prompt Design in Vertex AI
- **Kaggle:** Machine Learning
- **HackerRank:** Python
- **HackerRank:** MySQL

RELEVANT PROJECTS

House Price Prediction using ML Pipelines

[GitHub](#)

- Developed an end-to-end ML pipeline using Scikit-Learn and MLflow.
- Deployed an interactive web app using Streamlit hosted on AWS EC2.
- Achieved R^2 of 0.907 on test data, supporting real estate price insights.

GAN-based Anime Face Generator

[GitHub](#)

- Built and trained GAN models (DCGAN, WGAN-GP) using PyTorch Lightning to generate 64×64 anime face images.
- Improved visual quality with self-attention and spectral normalization.
- Reduced FID score by 12%, enhancing generated image realism.

CNN for Multi-Class Image Classification

[GitHub](#)

- Built a CNN in PyTorch to classify images of Cats, Dogs, and Snakes.
- Trained on dataset organized in separate class folders, achieving 87% accuracy with transfer learning.

Image Caption Generation

[GitHub](#)

- Implemented CNN-RNN based model to generate captions for images.
- Trained on the Flickr8k dataset with preprocessing, vocabulary building, and checkpointing.
- Evaluated results with qualitative image-caption outputs.

EXPERIENCE

ML Engineer Intern – Vcodez

(July 2025 – October 2025)

- Contributing to AI/ML projects with a focus on building end-to-end ML pipelines and deploying models.
- Assisting in developing production-ready ML applications using Python, Scikit-Learn, PyTorch, and TensorFlow.
- Collaborating with senior engineers on integrating ML solutions into real-world applications.
